

GROWIXA

The AI-Powered Growth & Campaign Automation Engine

Speed of AI • Precision of Human Control • Power of High Deliverability

Target Round: Seed (\$750K)

Sector: B2B SaaS / MarTech / AI

Status: MVP Complete / Architecture Validated

The Problem: Fragmented Tools & The AI Trust Crisis

Modern growth teams are overwhelmed by disconnected software and unverified AI outputs.

1. Tool Fragmentation & Bloat

Marketers juggle 4-6 separate tools for CRM, AI drafting, email sending, and analytics—wasting time and paying \$500+/mo in subscription fees.

2. The 'Copy-Paste' AI Gap

80% of marketers draft in ChatGPT in silos, losing context, contact variables, and audience segmentation when moving to email tools.

3. Unsupervised AI Risk

Autonomous AI tools risk sending hallucinations and spam, burning sender reputation and violating strict privacy regulations (GDPR/CAN-SPAM).

The Core Result: Marketers waste 3+ hours per campaign, suffer poor deliverability, and live in constant fear of AI errors reaching real inboxes.

Market Opportunity: \$65B Global MarTech Transformation

A massive shift from legacy point solutions to integrated, AI-native growth platforms.

TAM: \$65B Total Global Marketing Automation, CRM & Email Software Market.	SAM: \$18B SMB & Mid-Market Cloud Marketing Software in North America, Europe, and Asia-Pacific.	SOM: \$1.2B Fast-growing digital agencies, startups, creators, and high-velocity B2B SaaS teams.
--	--	--

Tailwinds Driving Growixa:

- **Rise of Generative AI:** Teams demand native AI generation directly inside campaign delivery tools.
- **Deliverability Crackdowns:** Google and Yahoo's stricter authentication rules require pristine sender isolation.
- **SaaS Consolidation:** Businesses are actively replacing fragmented 5-tool stacks with all-in-one platforms.

The Solution: Growixa Unifies the Entire Growth Stack

Combining the speed of generative AI with mandatory human control and enterprise deliverability.

Audience & Contact Engine Clean CSV imports, dynamic real-time segmentation, custom attributes, and automated GDPR/CCPA suppression.	AI Marketing Studio High-converting email sequences, multi-variant subject lines, brand voice enforcement, and mandatory human review.	High-Deliverability Engine 5-step wizard, test preview sends, Postmark delivery + Custom SMTP routing, and live engagement metrics.
---	---	--

The Growixa Workflow: Audience Segments -> AI Drafts Campaign -> Manager Reviews & Approves -> High-Deliverability Dispatch -> Live Analytics

Built-In Product Architecture & Enterprise Capabilities

Production-ready foundation engineered for scale, reliability, and security.

Frictionless 5-Step Wizard Audience Selection -> AI Content -> Personalization Tags -> Test Inbox -> Schedule/Deliver.	Dual-Route Sending Postmark API + Custom SMTP support for complete sender reputation and IP isolation.	Granular Team RBAC 6 distinct user roles (Super Admin to Viewer) with server-side permission enforcement.
Immutable Audit Trails Every draft edit, AI prompt, approval, and send is logged with exact timestamps and actor IDs.	AI Token Cost Metering Real-time AI compute tracking with strict budget guardrails to protect customer margins.	Complete Data Isolation Tenant data is strictly partitioned by account_id, ensuring zero cross-customer data leakage.

Competitive Landscape: Why Growixa Wins

Growixa is positioned uniquely at the intersection of AI Copilots and Delivery Infrastructure.

Dimension	Growixa	Brevo / Mailchimp	Jasper / Copy.ai
Core Focus	AI Growth & Delivery Engine	Legacy Email/CRM	Isolated AI Copywriting
AI Integration	Native AI Studio in Send Flow	Basic add-on / prompt box	Text editor only (No sending)
Content Governance	Mandatory Human Approval Gate	Manual copy-paste	None (External tool)
Infrastructure	Postmark + Custom SMTP	Shared IP network	N/A
Future Trajectory	Email -> Social -> SEO/AEO	Email & WhatsApp only	Text & Image Generation

Business Model & Unit Economics

Scalable SaaS Subscription + Usage-Based AI Expansion Revenue

Starter Plan (\$29/mo) • Up to 5,000 Contacts • 50,000 Emails / Month • AI Copywriting Studio • 2 Team Seats	Growth Plan (\$79/mo) • Up to 25,000 Contacts • 250,000 Emails / Month • Multi-Variant AI Engine • Custom SMTP + 5 Seats	Scale / Enterprise (\$199+/mo) • Unlimited Contacts • Dedicated IP Sending • Advanced RBAC & Audit • Custom AI Fine-Tuning
---	---	---

Key Financial Drivers:

- **High Gross Margins:** Projected 80%+ gross margin on software subscriptions.
- **Expansion Revenue:** Consumption-based AI token packs and high-volume email add-ons.
- **Low Churn Dynamics:** Embedded contact data and campaign history create high platform stickiness.

Go-To-Market Strategy (GTM)

Multi-pronged growth engine combining PLG, outbound sales, and ecosystem partnerships.

1. Product-Led Growth (PLG)

Frictionless self-service signup with a generous free trial. Users launch their first AI campaign in under 5 minutes.

2. Agency Partner Channel

Equip digital marketing agencies with multi-account tools to manage client campaigns at scale.

3. Targeted B2B Outbound

Direct outreach to fast-growing startups and growth leads suffering from Mailchimp/Brevo bloat.

Content & Community Flywheel: Publishing proprietary benchmarks on AI email deliverability, high-converting templates, and growth case studies to drive organic inbound.

Technology & Milestones Achieved

Robust, enterprise-grade architecture already built, tested, and validated.

- **Production-Grade Web Application:** Full Next.js frontend with modern Tailwind/design system.
- **Scalable Microservice Backend:** FastAPI Python backend with PostgreSQL and Redis task workers.
- **Dual Email Delivery Infrastructure:** Fully integrated Postmark adapter + Custom SMTP provider engine.
- **AI Studio & Human Governance:** Working AI generation pipelines with mandatory approval gates.
- **Automated CI/CD & Deployments:** Multi-environment VPS setup with Caddy auto-SSL and Docker Compose.
- **Enterprise Security Baseline:** RBAC, encrypted credentials, CSRF/XSS protection, and comprehensive audit trails.

Long-Term Product Roadmap

Expanding from Email Marketing into an Autonomous Cross-Channel Growth System.

Phase 1: Foundation (Current) • AI Email Marketing & Studio • Audience Segmentation & Consent • Postmark & Custom SMTP Routing • Team Roles & Audit Governance	Phase 2: Multichannel & SEO • Social Media Auto-Publishing • Website Intelligence & SEO Auditing • AEO (Answer Engine Optimization) • GEO (Generative Engine Optimization)	Phase 3: Autonomous Growth • Multi-Agent Growth Workflows • CMS Integration (WP / GitHub) • Predictive Audience Churn Alerts • Autonomous Campaign Tuning
---	---	--

Strategic Vision: Growixa will become the central operating system where a company manages its entire digital growth lifecycle without stitching tools together.

Team & Execution Velocity

Engineered for rapid iteration, strict code quality, and security excellence.

Full-Stack & Cloud Architecture

Deep background in designing highly available distributed backends, microservices, and modern web apps.

AI & Growth Engineering

Specialized expertise in LLM agent orchestration, prompt safety guardrails, and conversion copywriting.

Enterprise Deliverability

Proven experience in SMTP protocols, IP reputation warming, DNS authentication (SPF, DKIM, DMARC), and compliance.

Execution Principles: Fast delivery cycles, zero-compromise security, human-in-the-loop AI safety, and customer-first engineering.

The Ask: \$750,000 Seed Round

Accelerating Product Expansion and Customer Acquisition

45% Product & Engineering

- Expand SEO/AEO/GEO engine
- Multichannel social connectors
- Advanced predictive segmentation

35% GTM & Acquisition

- PLG onboarding optimization
- Targeted B2B outbound engine
- Agency partner channel program

20% Infrastructure & Ops

- Dedicated sending IP infrastructure
- Security audits & SOC 2 compliance
- High-availability operations
